BESCHREIBUNG

Stellar Nebula is a family of lamps designed by BIG to interpret and enhance artisanal glass blowing with innovative PVD finishing techniques.

Values, roles and limits of industrial and artisanal production are the core of this project idea, which aims to find a solution of industrial uniqueness.

The shapes of the hand blown diffusers are always unique.

The suspension has three different sizes while the floor, table, ceiling and clusters are only in the medium one.

Artisanal know-how and industrial innovation thus come together in the beauty of the material that enhances the magic interaction between glass and light.
